PROFESSIONAL SUMMARY

IT Service Desk professional with 5+ years of experience supporting enterprise users in fast-paced environments. Strong expertise in L1/L2 service desk operations, incident and request management, and ITIL-aligned service delivery. Proven ability to troubleshoot Windows OS, cloud infrastructure, containerized applications, and networking issues. Background in supporting AWS-based production environments, Kubernetes deployments, and CI/CD pipelines with a consistent record of meeting SLA, quality, and customer satisfaction targets.

TECHNICAL SKILLS

IT Service Desk & ITSM: IT Service Desk (L1/L2 Support), Incident Categorization, Prioritization & Resolution, SLA Management, Escalation Handling, ITIL Processes, Customer Communication

Cloud & Infrastructure: AWS (EC2, EKS, S3, VPC), Azure, Docker, Kubernetes, Terraform, Ansible, CloudWatch

Operating Systems & Applications: Windows OS, Linux, Microsoft 365 (Outlook, Teams, OneDrive), Enterprise Application Support

DevOps & CI/CD: Jenkins, GitHub Actions, GitLab CI/CD, Argo CD, Pipeline Troubleshooting, Deployment Automation

Access & Security: Active Directory, VPN & Remote Access, MFA Support, User Access Management, Bitlocker Recovery

Monitoring & Tools: Prometheus, Grafana, ServiceNow, Ticketing Systems, Documentation & Knowledge Base

Databases: PostgreSQL, MySQL, Prisma ORM, Basic SQL Troubleshooting

PROFESSIONAL EXPERIENCE

Specialist (IT Infrastructure & Cloud Support)

HCLTech | Apr 2024 – Aug 2025 | Hyderabad, India

- Delivered L1/L2 support for AWS-based production environments running containerized applications on EKS, handling availability, performance, and deployment issues across Dev, QA, and Prod.
- Supported Microsoft 365 applications including Outlook, Teams, and OneDrive, ensuring seamless collaboration for enterprise users.
- Managed Kubernetes clusters on EKS, troubleshooting pod failures, node issues, and deployment problems.
- Resolved VPN, authentication, and access-related issues, including MFA and SSO login failures.
- Identified recurring pod restarts and memory exhaustion issues; fixed them by correcting resource requests/limits and autoscaling thresholds, reducing repeat incidents by 30% over 6 months.
- Observed patterns of CI/CD failures; standardized pipeline templates and validation checks, reducing deployment failures by 25%.
- Detected infrastructure-level patterns such as unused volumes, stale AMIs; automated cleanup using scripts and Terraform to reduce monthly cloud costs by \$500 USD.
- Handled incident and service request management using monitoring tools, ensuring SLA compliance and proper documentation.

Senior Process Executive (IT Infrastructure Support)

Cognizant | Jul 2022 – Feb 2024 | Hyderabad, India

- Provided L1/L2 IT service desk support to enterprise users, handling production issues across deployments, networking, configuration, and runtime failures.
- Supported containerized applications on Kubernetes and EC2, troubleshooting pod restarts, node resource pressure, and performance issues.

- Investigated intermittent application downtime, identifying patterns related to traffic distribution and resource constraints.
- Troubleshoot service-to-service connectivity issues, tracing failures to incorrect security group rules, service ports, and DNS resolution problems.
- Resolved VPN and remote access issues, ensuring business continuity for remote users.
- Handled CI/CD pipeline failures; coordinated fixes across Git repositories, build configs, and artifact registries.
- Maintained clear documentation of incidents, resolution steps, and user communication for audit and knowledge reference.

Engineer (Technical Support)

CSS Corp | Sep 2021 – May 2022 | Hyderabad, India

- Performed first-line support for cloud-hosted applications, monitoring system health and responding to alerts related to EC2, storage, and application services.
- Handled user account-related issues, including password resets, account unlocks, and basic access management.
- Detected recurring storage and disk utilization issues; coordinated cleanups and capacity adjustments to prevent outages.
- Supported users with multi-factor authentication (MFA) issues, troubleshooting OTP failures and device verification problems.

Process Executive (IT Service Desk)

Infosys | Sep 2019 – Jun 2021 | Hyderabad, India

- Provided technical support for enterprise users, resolving software, hardware, and network-related issues in production environments.
- Logged, categorized, prioritized, and resolved incidents and service requests as per defined SLAs and support procedures.
- Observed recurring issues caused by configuration drift and outdated versions; flagged them for corrective action instead of repeated fixes.
- Worked in SLA-driven support environment, consistently meeting productivity, quality, and customer satisfaction benchmarks.

EDUCATION

B.Tech, Computer Science Engineering

Acharya Nagarjuna University | CGPA: 9.27

CERTIFICATIONS (In Progress)

- Microsoft Azure Fundamentals (AZ-900)
- AWS Solutions Architect Associate

KEY STRENGTHS

Systems Thinker • Problem-Solving Mindset • End-to-End Ownership • ITIL Aligned • Highly Adaptable • Fast Learner
